Contents

A Sodium-Independent Mechanism for L-Arginine Uptake by Rat Renal Brush Border Membrane Vesicles
Thierry Jean, Pierre Ripoche, and Philippe Poujeol 1

Interaction of Monomeric and Oligomeric Soybean Agglutinins with Pig Lymphocytes and Plasma Membranes
Lynn D. Yates and Harvey J. Sage 19

Characterization of Solubilized Opiate Receptors from Human Placenta
Mahmoud S. Ahmed 35

Evidence that Trypsin Digestion Exposes a Channel in the Sarcoplasmic Reticulum Membrane
K. C. Toogood, B. Folsom, T. Topping, H. McCutchan, M. J. Dolejsi, S. Johns, G. Stuart, and A. K. Dunker 49

The Dibromothymoquinone Effect on Membrane Potential Generation in *Rhodospirillum rubrum* Chromatophores
Alexander V. Oleskin and Vitaly D. Samuilov 77

Membrane Structural Alterations in Malignant and Normal Avian Lymphocytes: A Raman Investigation
Lucian V. Del Priore, Aaron Lewis, and Karel A. Schat ... 97

Ca^{2+}-Flux Modulation by Calciductin Phosphorylation in Cardiac Sarcolemma
Maxwell T. Hincke, Murielle L. Rinaldi, Jean-Paul Capony, and Jacques G. Demaille 109

Role of Phospholamban in Regulating Cardiac Sarcoplasmic Reticulum Calcium Pump
Indu S. Ambudkar and Adil E. Shamoo 119

Hormonal and Neurotransmitter Regulation of Ca^{++} Influx Through Voltage-Dependent Slow Channels in Cardiac Muscle Membrane
Nick Sperelakis 131

Inhibition by Orthovanadate of ATP-Dependent Ca^{2+} Transport in Microsomes Isolated from Rat Liver
Ronald J. Epping and Fyfe L. Bygrave 167

Binding, Activation, and Solubilization of the Ca^{2+}-ATPase from Sarcoplasmic Reticulum by Nonionic Detergents
William L. Dean and Carolyn P. Suarez 181

Effect of Different Detergent Systems on the Molecular Size of UDP Glucuronosyltransferase and Other Microsomal Drug-Metabolizing Enzymes
Peter I. Mackenzie, Matti A. Lang, and Ida S. Owens 193

Depolarization-Induced Increase in Synaptosomal Membrane Calcium Monitored by Chlorotetracycline Fluorescence
Wayne Hoss and Michele Formaniak 209

Effects of Cd^{2+} on ATP-Driven Membrane Potential in Beef Heart Mitochondrial H^+-ATPase: A Study Using the Voltage-Sensitive Probe Oxonol VI
Michael J. Pringle and D. Rao Sanadi 225

Changes in Interfacial Potentials Induced by Carbonylcyanide Phenylhydrazone Uncouplers: Possible Role in Inhibition of Mitochondrial Oxygen Consumption and Other Transport Processes
Juan Reyes and Dale J. Benos 243

Reconstitution of the Melibiose Carrier of *Escherichia coli*
Dorothy M. Wilson, Kathleen Ottina, Michael J. Newman, Tomofusa Tsuchiya, Susumu Ito, and T. Hastings Wilson... 269

Effect of Temperature on Protein Synthesis and Leucine Transport by Yeast Mitochondria
Eric Finzi, Liviu Clejan, and Diana S. Beattie 291

Resolution and Reconstitution of H^+-ATPase Complex from Beef Heart Mitochondria
Saroj Joshi, James B. Hughes, Katalin Torok, and D. Rao Sanadi 309

Solubilization and Reconstitution of the Calcium Release Channel of Skeletal Sarcoplasmic Reticulum
S. Tsuyoshi Ohnishi, Kurumi Y. Horiuchi, and Kazumi Horiuchi 327
